

Creating a Team of School Loop Mentors for Your School Site

School Loop highly recommends creating an on-site team of School Loop Mentors. The mentor team serves as an on-site resource for School Loop related needs.

It is important that the mentors have a genuine interest in School Loop and are willing to help their coworkers. *It is ideal to identify the School Loop Mentors as soon as you know School Loop will be a part of your school community.*

Please create a team of mentors that suits the needs of your school. We recommend having the following members as a part of the team of School Loop Mentors:

- An administrator (Principal, AP...)
- A technology coordinator/teacher
- A non-teaching staff member
- At least one teacher

A School Loop Mentor can be:

- A recommended representative from each department
- School Loop “power users” (individuals that use School Loop frequently). You can also identify power users using School Statistics. Power users are typically individuals with high numbers of posts.
- Any teacher interested in helping out!

*School Loop has training programs to support mentors including train-the-trainer programs, advanced features web conferencing, and more!
